Senior Java Applications Developer

Company: Citi | **Location:** Belfast, Northern Ireland, UK

Job Link: https://www.linkedin.com/jobs/view/4484152193

Job Description & Requirements:

About the team:
Event Master Central
is Citi’s centralized corporate action event repository and distribution platform that consolidates corporate action announcements and notifications from various vendors with cross-business operational process. As a critical pillar within the
Master Reference Data (MRD)
and the broader
Citi Enterprise Data Organization (EDO)
, our team is responsible for modernizing and managing the end-to-end lifecycle of corporate Action events across the enterprise.

What you will do:

* Develop and implement complex software solutions using Java/J2EE, Spring Boot, and RESTful web services.
* Design, develop, and maintain robust microservices adhering to architectural best practices.
* Apply hands-on expertise in Core Java, including multi-threading and the Collections framework.
* Utilize Spring Framework effectively for application development.
* Work extensively in creating and optimizing SQL queries.
* Ensure adherence to software engineering best practices, object-oriented programming (OOP) principles, and design patterns.
* Contribute to the continuous integration and continuous delivery (CI/CD) pipelines.
* Manage source code effectively using tools such as Git or Bitbucket.
* Promote and apply clean coding principles and maintain high quality using tools like Sonar.
* Design and implement comprehensive unit, integration, and functional tests to ensure solution quality.
* Analyze and solve complex technical problems efficiently.
* Work with a team of application developers, fostering a culture of excellence, collaboration, and continuous improvement.

Key Skills and Experience required:

* Experience in developing and implementing complex software solutions.
* Strong knowledge of Java/J2EE, Spring Boot, and RESTful web services (XML, JSON).
* Proven experience working with Microservices Architecture.
* Hands-on experience with Core Java, Multi-threading, Collections framework, and Spring Framework.
* Solid understanding of software engineering best practices, OOP, design patterns, and CI/CD pipelines.
* Experience with source code management tools (Git).
* Understanding of clean coding principles and code quality measurements using tools like Sonar.
* Demonstrated ability to design and implement unit, integration, and functional tests.

* A strong, solution-driven mindset with the ability to analyze complex problems, devise strategic solutions, and lead their implementation.
* Good written and verbal communication skills.

Advantages
:

* Experience with AI technology (Devin, Co Pilot)
* Understanding of Cloud-native development principles.
* Experience with Container Orchestration tools (Docker, Kubernetes, OpenShift, etc.).
* Proficiency in using Jira for tracking tasks, managing backlogs, and participating in sprint cycles.

What we can offer:
At Citi, you will work at the intersection of data, finance, and commercial strategy, contributing to decisions that have real impact across a global organization. This role offers meaningful autonomy, cross-functional collaboration, and the opportunity to grow your analytical and governance expertise within a high-performing team.

* A hybrid working model with 3 days in the office and 2 days working remotely, giving you flexibility alongside team connection.
* Exposure to complex, high-value commercial and financial decisions that directly shape vendor strategy at a global scale.
* Access to learning and development resources that support your growth in data analytics, financial governance, and emerging technologies.
* The opportunity to work across finance, sourcing, and technology functions, broadening your professional network and cross-functional expertise.
* Wellbeing support and work-life balance initiatives designed to help you perform at your best.
* Competitive financial benefits and a rewards package aligned to your experience and contribution.

Apply today to bring your data and governance expertise to a role where your analysis shapes commercial outcomes at one of the world's leading financial institutions.

If you are a highly motivated, results-oriented individual with a passion for technology risk management, we encourage you to apply!
